Product Overview

Professional Diamond Turbo Grinding Wheel

This professional-grade diamond turbo grinding wheel is engineered for efficient material removal and high-precision surface preparation. Featuring a specialized turbo design, it optimizes airflow to reduce heat buildup, which significantly extends the tool's lifespan during aggressive grinding tasks. Constructed using advanced cold press, hot press, and high-frequency welding techniques, this wheel offers exceptional durability and consistent abrasive performance on hard materials.

Technical Specifications

Manufacturing Techniques

- Cold press
- Hot press
- High-frequency welding

Compatible Materials

Concrete, Stone, Masonry, Marble, Granite

Performance Metrics

Performance & Safety

280 RPM/Class

Speed Rating

Design Features

Key Features

Turbo Design • Threaded Attachment • Segmented Rim • High-Durability Steel Core

Mounting Type

Threaded arbor
