

# Threaded Socket Lamp Holder

This lamp holder features a threaded socket for secure bulb attachment. Its durable construction ensures longevity and reliable performance in various lighting applications.

## Overview

### Professional Lighting Component

This threaded socket lamp holder is designed for reliable and secure bulb installation in various lighting fixtures. Constructed from high-quality bakelite and copper, it offers durability and consistent performance for professional electrical applications. The design supports both E14 and E27 standards, providing versatility for different lighting needs.

## Technical Specifications

### Materials Used

- Bakelite
- Copper

### Available Colors

Black • White

### Compatible Base Types

E14, E27

### Model Number

LXC-L750
