Product Overview

Professional Grade Stainless Steel Fittings

These high-quality threaded pipe fittings are engineered for durability and reliability in demanding industrial environments. Constructed from premium SS304 or SS316 stainless steel, they provide exceptional corrosion resistance and a secure, leak-proof connection for various fluid transfer systems. They are precision-machined to meet international standards, making them an ideal choice for plumbing, gas, and hydraulic applications requiring long-term performance.

Technical Specifications

Materials	SS316, SS304
Available Sizes	1/8 inch to 6 inches

Standards & Compliance

Design Standards

- ASTM/ASME B16.3
- MSS SP-114
- DIN
- BS

Thread Specifications

- ANSI/ASTM B1.20
- ISO49
- NPT
- BSPT
- BST
- DIN 2999
