

Three-Blade Ceiling Fan for Air Circulation

This three-blade electric fan is designed for ceiling mounting. It features aerodynamically designed blades for efficient air circulation via an electric motor.

Product Overview

High-Efficiency Air Circulation

This three-blade ceiling fan is engineered for optimal air circulation in professional or commercial environments. Featuring an aerodynamically designed blade structure, it ensures consistent airflow and efficient operation. The unit is designed for secure ceiling mounting and reliable electrical power integration.

Design & Construction

Number of Blades	3
Mounting Style	Ceiling Mount
Design Features	Aerodynamic Blades, Central Motor Housing, Downward-Extending Mount

Technical Specifications

Primary Use	Air Circulation • Ventilation
Power Source	Electrical
