

Three-Bowl Slush Machine with Independent Temperature Control

This slush machine is designed with three bowls for producing and dispensing frozen beverages. Each bowl has independent temperature control, allowing for a variety of frozen drinks to be served at the same time.

Overview

High-Performance Three-Bowl Slush Solution

This professional-grade slush machine features three independent bowls, allowing you to serve a variety of frozen beverages simultaneously. Each bowl is equipped with independent temperature control, ensuring optimal consistency and flavor for different drink types. Designed with durable stainless steel construction and transparent bowls, it is an ideal, hygienic solution for high-traffic commercial environments like restaurants, bars, and cafes.
