

Three-Door Vitamin Preservation Refrigerator

This three-door refrigerator series incorporates environment-friendly technology and an energy-saving design. It is designed for efficient storage and preservation of food items, maintaining optimal conditions for freshness and includes a vitamin preservation option.

Product Overview

Professional Preservation Solution

This three-door refrigerator is engineered for high-efficiency food storage and preservation in professional settings. It incorporates advanced, environment-friendly cooling technology to ensure consistent freshness. The design emphasizes energy conservation while providing the flexibility of an optional vitamin preservation feature to extend the quality of stored items.
