

Three-Level Steel Roll Cage Container

This three-level steel roll cage container is designed for efficient storage and transportation. It features a wire mesh structure and heavy-duty casters for organized stacking and smooth mobility.

Product Overview

Three-Level Steel Roll Cage Container

This robust three-level roll container is specifically engineered for efficient storage and transport in the textile, laundry, and food service sectors. Featuring a horizontal two-hinged half-door design, it ensures easy access to goods while maintaining structural integrity. Its collapsible nature allows for space-saving storage when not in use, making it a flexible solution for modern warehouse management.

Design and Construction

Design Features

- Three-level configuration for organized stacking
- Horizontal 2-hinged half door for easy access
- Collapsible design for space saving
- Wire mesh structure
- Heavy-duty casters for mobility

Finish and Durability

Available Finishes

Galvanizing, Powder Coating

Industry Applications

Suitable Industries

Textile Industry • Laundry Services • Food Industry • Warehousing • Logistics

Key Advantages

Operational Benefits

Feature	Value Proposition
Versatility	One format for every case
Efficiency	Eliminates reloading
Security	Keeps consignments together
Storage	Collapsible when not in use
