

Three-Phase 100 Frame AC Motor, 220/380V, 1400 RPM

This three-phase asynchronous motor is designed for steady operation. It is known for its competitive price and excellent quality.

Overview

Industrial Performance

The MS series three-phase asynchronous motor is engineered for robust industrial performance, featuring a 100 frame size and versatile 220/380V compatibility. Built with 100% copper windings, this motor ensures high efficiency and durability for demanding applications. It is an ideal solution for powering pumps, fans, compressors, and other general-purpose machinery requiring consistent reliability.
