

Three-Phase Aluminum Housing Induction Motor

This high-efficiency, three-phase asynchronous motor comes with an aluminum housing. Its compact and lightweight design is suitable for continuous duty operation in diverse industrial environments.

Product Overview

MS Series Induction Motor

The MS series three-phase induction motor features a lightweight aluminum housing designed for high efficiency and reliability. Its compact structure and optimized ventilation system ensure superior thermal performance, making it suitable for continuous duty operation across a wide range of industrial environments. This versatile motor is available in various power outputs and frame sizes to accommodate diverse application requirements.

Technical Specifications

Duty Cycle

Continuous Duty

Motor Type

Three-Phase Asynchronous Induction Motor

Housing Material

Aluminum

Key Features

Design Highlights

- Compact structure
- Lightweight aluminum construction
- Optimized thermal ventilation
- General-purpose industrial application
