

Three-Phase Asynchronous Electric Motor

This three-phase asynchronous electric motor is designed for industrial applications. It features a robust cast iron frame with cooling fins for efficient heat dissipation.

Product Overview

Industrial Performance

This three-phase asynchronous electric motor is engineered for demanding industrial environments. Featuring a robust cast iron frame with integrated cooling fins, it ensures efficient heat dissipation and reliable, continuous operation. It is an ideal power solution for machinery such as pumps, fans, and compressors.

Technical Specifications

Motor Type	Three-phase asynchronous
Housing Material	Cast iron
Cooling Method	External cooling fins

Applications

Compatible Machinery	Pumps, Fans, Compressors, General Industrial Machinery
----------------------	--

Design Features

Key Design Features

- Robust cast iron frame
- Integrated cooling fins for heat dissipation
- Protective end shield
- Accessible terminal box
