

Three-Phase Asynchronous Electric Motor

This three-phase asynchronous motor is engineered for reliable performance. It is suitable for a variety of industrial applications requiring consistent power output.

Overview

YE2 Series Three-Phase Asynchronous Motor

The YE2 series three-phase asynchronous motor is engineered for consistent, reliable industrial performance. Built with 100% copper wire and adhering to international quality standards, this series provides a versatile solution for various mechanical applications. It supports multiple mounting configurations and efficiency standards, ensuring compatibility with diverse system requirements.

Technical Specifications

Performance Metrics

11 kW

Rated Power

1460 r/min

Speed

88.4 %

Efficiency

22.2 A

Current

Technical Data

Parameter	Specification
Model Type	Y2160M-4
Voltage	380 V
Frequency	50 Hz
Protection Class	IP54
Insulation Class	Class B
Duty Cycle	S1
Power Factor	0.84

Design & Compatibility

Available Poles

- 2
- 4
- 6
- 8
- 10

Efficiency Standards

IE1 • IE2

Mounting Configurations

B3, B5, B35, B14, B34

Compliance & Quality

Certifications

CCC, CE, ISO 9001:2015, GB/T19001-2006
