

Three-Phase Four-Wire Energy Meter

This is a three-phase four-wire electronic energy meter designed to measure electrical energy consumption. It features an LCD display for showing peak electricity consumption.

Product Overview

High-Precision Energy Monitoring

This three-phase four-wire electronic energy meter is engineered for accurate monitoring of electrical consumption in commercial and industrial environments. Designed for reliability, it features a clear LCD display for easy reading of peak electricity usage data. Compliant with established industry standards, it offers a robust solution for energy management and billing applications.

Technical Specifications

Rated Current

5 A

Base Current

20 A

Maximum Current

Voltage Rating

3x220/380V

Frequency

50 Hz

Compliance & Standards

Standards

GB/T15284-2002

Features

Monitoring Features

- Three-phase four-wire measurement
- Peak electricity consumption tracking

Display Type

LCD

Model Identification

Model Number

DTSF169
