

Three-Phase Induction Motor

This high-efficiency three-phase induction motor is designed for industrial applications. It features a robust cast iron frame, optimized cooling system, and durable bearings for extended service life.

Overview

Industrial Performance Motor

This high-efficiency three-phase induction motor is engineered for demanding industrial environments requiring consistent performance. Built with a robust cast iron frame and an optimized cooling system, it ensures reliability during continuous duty operations. Its durable bearing design provides an extended service life, making it an ideal solution for critical machinery applications.

Key Features

Technical Attributes

High Efficiency, Cast Iron Frame, Optimized Cooling, Continuous Duty

Construction

Materials and Design

Component	Specification
Frame Material	Cast Iron
Cooling System	Optimized Airflow
Duty Cycle	Continuous
