

Three-Phase Induction Motor

This high-efficiency three-phase induction motor is designed for industrial applications. It features robust construction with an optimized cooling system and premium insulation.

Product Overview

High-Efficiency Induction Motor

The MS Series three-phase induction motor features a durable aluminum housing designed for versatile industrial applications. Engineered for high efficiency and energy savings, this motor operates with minimal noise and vibration levels. It is an ideal solution for general-purpose machinery, including pumps, fans, conveyors, machine tools, and food processing equipment.

Technical Specifications

Protection Class

IP54 • IP55

Insulation Class

F

Operating Environment

Ambient Temperature Range

-15 °C

Minimum

40 °C

Maximum

Maximum Altitude

1000 m

Applications

Typical Applications

- Cutting machines
- Pumps
- Fans
- Conveyors
- Machine tools
- Farm duty equipment
- Food processing

Features

Key Features

High Efficiency, Energy Saving, Low Noise, Low Vibration, Aluminum Housing
