

# Three-Phase Land Use Generator

The XN182/184 three-phase land use generator is engineered for robust performance. It is designed for land-based applications.

## Overview

### Professional Power Solutions

The XN182/184 is a professional-grade three-phase generator engineered for robust land-based operations. Designed for reliability in demanding commercial and industrial environments, this unit offers consistent power performance. Its heavy-duty construction ensures durability for continuous use in various power-critical applications.

## Technical Specifications

Phase Configuration	Three-Phase
Primary Application	Land Use, Industrial, Commercial
