

Three-Phase Motor Control Box for Motors up to 5.5kW

This automatic control box is designed for three-phase motors with power up to 5.5 kW (7.5 HP). It is engineered for dependable operation and the protection of electric motors in various applications.

Product Overview

Professional Three-Phase Motor Control

The DYA-T01 is an automatic control solution engineered specifically for three-phase electric motors. Designed for reliability and safety, this unit supports motor power outputs up to 5.5kW (7.5HP). It is an ideal choice for integrated water pumping systems in agricultural, industrial, and domestic environments.

Technical Specifications

Maximum Motor Power

5.5 kW Power Capacity	7.5 HP Horsepower
---------------------------------	-----------------------------

Control Mode	Automatic
Phase	Three-Phase

Compliance and Standards

Certifications	CE, RoHS, GS
