

# Three-Plane 360° Cross Line Laser Level

This three-plane 360° cross line laser level projects two 360° vertical lines and one 360° horizontal line. It is designed for precise alignment in construction, installation, and interior finishing.

## ADDITIONAL IMAGES

## Product Overview

### Professional 360° Laser Leveling Solution

This three-plane 360° cross line laser level offers comprehensive room coverage with a single setup, featuring one horizontal and two vertical 360° green beams spaced 90° apart. Designed for durability and precision, the unit is water, mud, and shock resistant, making it ideal for demanding construction and interior finishing environments. Its self-leveling capability ensures fast and accurate alignment, while the rechargeable lithium-ion battery supports extended working times.

## Technical Specifications

### Working Range

**40 m**

Visibility Range

**130 ft**

Visibility Range

### Beam Configuration

- 1 x 360° Horizontal Plane
- 2 x 360° Vertical Planes
- 90° Separation between vertical beams

## Features & Durability

Environmental Resistance	Water Resistant, Mud Resistant, Shock Resistant
Power System	Lithium-ion battery
Self-Leveling	Yes
Slope Setting Capability	Yes
