

Three-Tier Metal Shelving Unit

This three-tier shelving unit is made from durable metal. It features adjustable shelves and diagonal bracing for enhanced stability, making it suitable for heavy loads in warehouses, garages, and storage areas.

Product Overview

Industrial Three-Tier Shelving Unit

This three-tier metal shelving unit offers a simple, accessible storage solution designed for daily use in hardware warehouses and industrial environments. The system features an adjustable shelf-storey design, allowing users to easily increase or decrease laminate levels to meet specific storage requirements. Built for reliability and affordability, it incorporates a high-end surface treatment process to ensure long-term durability.

Technical Specifications

Number of Tiers	3
Anti-Oxidation Guarantee	10 years

Construction & Finish

Coating Standard	High-End Powder • Premium Grade
Surface Coating Process	Phosphate Rust Treatment, Epoxy Polyester Coating

Features

Key Features

- Adjustable shelf height
- Simple structural assembly
- High anti-oxidation resistance
- Suitable for heavy-duty warehouse use
