

Three-Way Coaxial Splitter 5-900 MHz

Three-way splitter divides a single signal into three outputs. It operates between 5-900 MHz and uses standard coaxial connectors.

Product Overview

High-Performance Signal Distribution

This three-way coaxial splitter is engineered to efficiently divide a single input signal into three distinct output streams. Operating within a frequency range of 5-900 MHz, it ensures reliable signal distribution for cable television and satellite installations. Its robust design features standard coaxial connectors, making it an ideal solution for connecting multiple devices from a single source.

Technical Specifications

Frequency Range

5 MHz

Min Frequency

900 MHz

Max Frequency

| | |
|-----------------------|------------------|
| Splitter Type | 3-Way Coaxial |
| Connector Type | Standard Coaxial |

Applications

Primary Applications

- Cable Television Distribution
- Satellite Signal Routing
- Multi-Device Connectivity
