

Three-Wheeled Cargo Motorcycle

This three-wheeled vehicle combines a motorcycle front end with a rear cargo bed. It is suited for urban transport and light commercial hauling.

Overview

Versatile Urban Cargo Solution

This three-wheeled cargo motorcycle is engineered for efficient urban logistics and light-duty commercial transport. Featuring a robust motorcycle-style front end and a durable rear cargo bed, it provides a stable platform for navigating narrow city streets. The vehicle is designed to balance agility with utility, making it an ideal choice for businesses requiring reliable and compact transportation solutions.
