

Three-Wheeled Cargo Transport Vehicle

This three-wheeled vehicle is designed for cargo transport, featuring a robust frame and a rear cargo bed. It is equipped with a single front wheel and dual rear wheels for stability.

Product Overview

Versatile Cargo Transport Solution

This robust three-wheeled cargo transport vehicle is engineered for efficient goods movement across diverse environments. Featuring a motorcycle-style cockpit with intuitive handlebar controls, it ensures ease of operation for the driver. The rear cargo bed is built with durable metal railings, providing a reliable platform for hauling a variety of goods securely.
