

Three-Wheeled Cargo Vehicle

This three-wheeled vehicle is equipped with a cargo bed for transporting goods. It features a scooter-like front end with a windshield and headlights.

Product Overview

Versatile Three-Wheeled Cargo Solution

This three-wheeled cargo vehicle is engineered for efficient short-distance transport in urban and commercial environments. Featuring a stable, scooter-style front chassis with a protective windshield, it offers a blend of maneuverability and reliability. The rear cargo bed is equipped with protective side rails, making it ideal for hauling goods, while the additional rear seating provides flexibility for passenger transport.

Technical Specifications
