

Three-Wheeled Non-Motorized Cycle with Covered Passenger Area

This non-motorized cycle is designed for various transportation needs. It features a three-wheeled configuration, providing enhanced stability and load-carrying capacity, along with a covered passenger area for protection.

Product Overview

Versatile Non-Motorized Transport Solution

This three-wheeled cycle is designed for efficient short-distance travel and light commercial applications in urban environments. Featuring a stable three-wheel configuration and a robust frame, it offers enhanced load-carrying capacity and reliable performance. The integrated covered passenger area, complete with a front windshield and wiper, ensures protection from the elements for year-round utility.

Design & Construction

Wheel Configuration

3 qty
Total Wheels

Frame Construction	Robust heavy-duty frame
Exterior Finish	Green with white front stripe

Passenger & Cargo Features

Visibility & Safety

- Front windshield
- Integrated windshield wiper

Passenger Area	Fully covered for weather protection
----------------	--------------------------------------

Operational Details

Propulsion

Non-Motorized • Manual Power

Primary Applications	Urban Transport, Short-Distance Travel, Light Commercial, Cargo Transport
Stability	Enhanced stability via three-wheeled configuration
