

Three-Wheeled Utility Motorcycle with Cargo Bed

This three-wheeled motorcycle is equipped with a cargo bed for utility. It features a single front wheel and dual rear wheels, along with a headlight, mirrors, and a metal frame enclosing the cargo bed.

Overview

Versatile Utility Transport

This three-wheeled utility motorcycle is engineered for efficient goods transport in urban and industrial environments. Featuring a stable design with a single front wheel and dual rear wheels, it offers enhanced balance for heavy-duty tasks. The integrated cargo bed, protected by a durable metal frame, provides a secure solution for moving supplies and equipment.
