

Three-Wheeled Utility Motorcycle

This three-wheeled motorcycle is designed for utility and transport purposes. It features a single front wheel and dual rear wheels for enhanced stability, along with a rear cargo area.

Overview

Robust Utility Transport

The CT125ZK-2 is a versatile three-wheeled motorcycle engineered for both personal transport and commercial utility applications. Featuring a stable single front wheel and dual rear wheel configuration, it offers enhanced balance for hauling loads. Its durable frame construction ensures long-term reliability, while the integrated cargo bed makes it an ideal solution for transporting goods or equipment.
