

Three-Zone Food Preservation Refrigerator

This refrigerator features three distinct food management zones: refrigeration, soft freezing, and deep freezing. It offers independent storage to meet various food needs and ensure scientific preservation.

Product Overview

Three-Zone Food Preservation Refrigerator

This advanced refrigerator features three independent management zones—refrigeration, soft freezing, and deep freezing—to ensure optimal preservation for fruits, vegetables, meat, and fish. Designed to eliminate cross-contamination, it offers a dedicated soft-freezing compartment that allows for immediate slicing of frozen items without waiting for thawing. With its high-efficiency compressor and first-class energy efficiency, it provides a powerful, eco-friendly cooling solution for any professional or home kitchen.

Technical Specifications

Energy Efficiency

First-class

Refrigerant

R600a (Fluorine-free)

Insulation Technology

High-density micro-pore integrated foam layer

Voltage Design

Wide voltage range design

Storage & Features

Independent Storage Zones

- Refrigeration
- Soft Freezing
- Deep Freezing

Key Features

Soft-freezing ready-to-cut, Anti-cross contamination, Adjustable shelves, Metal wave-type wine rack

Performance Metrics

System Efficiency

218 L

Model Capacity
