

Thyristor MIG/MAG Semi-Automatic Welder

This is a thyristor-controlled MIG/MAG semi-automatic welder. The welding machine is designed for MIG/MAG welding applications and features thyristor control for precise and reliable performance.

Overview

NBC-R Series Thyristor Welder

The NBC-R series is a robust thyristor-controlled MIG/MAG semi-automatic welding system designed for demanding industrial environments. This versatile machine ensures precise and reliable arc performance, making it an ideal choice for high-quality welding tasks. Engineered for efficiency, it supports consistent operation across a variety of metal fabrication applications.

Technical Specifications

Control Technology

Thyristor Controlled

Model

NBC-630R

Welding Modes

MIG, MAG, Manual Welding
