

Tie Rod End Assembly

This tie rod end assembly connects the steering rack to the steering knuckle. It features durable metal construction, a protective rubber boot, a lock washer, and a nut.

Product Overview

Steering System Reliability

The tie rod end assembly serves as a critical link in the vehicle's steering system, effectively connecting the steering rack to the steering knuckle. Engineered for durability, the unit features robust metal construction designed to withstand the rigors of daily operation. It comes equipped with a protective rubber boot to seal out contaminants, while the included lock washer and nut ensure a secure, straightforward installation process.

Technical Specifications

Included Components

- Tie rod end
- Protective rubber boot
- Lock washer
- Nut

Primary Function

Connects steering rack to steering knuckle

Key Features

Durable metal construction, Threaded attachment, Contamination protection
