

Tile Cutter with Water Cooling System

This tile cutting machine is designed for cutting tiles of various sizes and materials. It features a water cooling system to reduce dust and heat during cutting, extending the life of the diamond blade and improving cut quality.

Product Overview

Professional Tile Cutting Efficiency

The TS180 tile cutting machine is a robust tool designed for high-precision cutting of various tile sizes and materials. Integrated with a water cooling system, it effectively minimizes dust and heat, significantly extending diamond blade life and ensuring clean, high-quality edges. Its stable construction and user-friendly features, such as the sliding table and adjustable fence, make it an ideal choice for accurate, repetitive cutting tasks in professional settings.

Key Features

Built-in Capabilities

- Water cooling system for dust and heat management
- Precision sliding table mechanism
- Adjustable cutting guide for repetitive cuts
- Foldable stand for easy transport and storage
- Diamond cutting blade

Safety & Standards

Dust Reduction, Thermal Management
