

# Tile Cutting Machine with Water Cooling

This tile cutting machine is engineered for precision and efficiency. It features a durable frame, powerful motor, and an integrated water cooling system to reduce dust and prolong blade life.

## Product Overview

### Professional Grade Tile Cutting

This high-performance tile cutting machine is designed for precision, efficiency, and durability in professional tiling applications. It features a robust frame equipped with a powerful 1100W motor and an integrated water cooling system that minimizes dust while extending the life of the diamond blade. With a spacious work surface and versatile adjustment capabilities, it is the ideal tool for demanding tile installation tasks.

## Performance Metrics

### Key Technical Metrics

<b>1100 W</b> Motor Power	<b>1.5 HP</b> Motor Horsepower	<b>110 V</b> Voltage	<b>60 Hz</b> Frequency
------------------------------	-----------------------------------	-------------------------	---------------------------

## Technical Specifications

### Work Table Specifications

Feature	Specification
Table Material	Steel with rubber surface
Table Dimensions	950 x 550 mm

### Cutting Capabilities

- Continuous rim diamond cutting wheel
- Infinitely adjustable miter stop for diagonal cuts
- Motor holder tilts 0-45 degrees for jolly cuts
- Motor guide with 4-fold ball bearing

## System Features

Cooling System	Yes
Included Components	Water cooling pump, Water trough, Aluminium stop, Diamond cutting wheel
