

Tile Cutting Saw

This tile cutting saw is designed for precise and efficient cutting of various tile materials. It features a powerful motor, adjustable cutting guide, and integrated water cooling system.

Product Overview

Professional Precision Tile Cutting

This high-performance tile cutting saw is engineered for precise and efficient processing of ceramic, porcelain, and stone tiles. It features a robust steel work table and an advanced motor guide system with four-fold ball bearings for smooth, accurate operation. Designed for versatility, the unit supports both standard and miter cuts, including jolly cuts through an adjustable 0-45 degree motor tilt.

Technical Specifications

Core Components

- Continuous rim diamond cutting wheel
- Sturdy aluminium stop
- Infinitely adjustable miter stop
- Motor guide with 4-fold ball bearings

Work Table Dimensions	660x510mm
Miter Cutting Range	45 degrees

Key Features

Surface Material

Rubber Surface Work Table

Capabilities	Jolly Cuts, Diagonal Cuts, Precision Guided, Dust Reduction
