

Tillage Machine

The tillage machine is suitable for plains, mountain areas, and hilly regions. It is applicable to paddy fields, dry land, and orchards.

Overview

Versatile Tillage Solution

This tillage machine is engineered for high-efficiency soil preparation across diverse terrains. It is specifically designed to excel in challenging environments, including mountain areas and hilly paddy fields, while maintaining robust performance in dry land and orchards. With capabilities for plowing, raking, and leveling, it serves as a comprehensive tool for modern cultivation needs.

Applications

Supported Operations

- Plowing
- Raking
- Dishing
- Flat field operations

Suitable Field Types

Mountain Areas, Hilly Fields, Paddy Fields, Dry Land, Orchards

Technical Details

Model

1Z-31
