

Tillage Machine

This tillage machine is suitable for plains, mountains, hills, paddy fields, and dry land. It can be used for plowing, raking, disking, and leveling fields.

Overview

Versatile Soil Preparation Solution

The 1Z-31B tillage machine is a robust and versatile agricultural tool engineered for efficient soil preparation and cultivation. Designed to handle diverse terrains, it excels in mountain areas, hilly paddy fields, dry lands, and orchards. Its durable construction and effective tilling blades ensure optimal seedbed preparation, making it a reliable solution for small to medium-sized farming operations.

Applications

Operational Functions

- Plow
- Rake
- Dish
- Flat field operations

Suitable Environments

Mountain Area, Hilly Area, Paddy Field, Dry Land, Orchard

Design & Features

Design Highlights

Adjustable Handle • Ergonomic Design • Durable Construction

Performance Metrics

1 Soil Preparation
