

Tillage Sweep for Soil Cultivators

This tillage sweep is designed for use with agricultural cultivators, specifically for soil preparation and weed control. Its angled design allows for efficient cutting and lifting of soil, promoting aeration and root development.

Product Overview

Professional Soil Cultivation Solution

This tillage sweep is engineered for high-performance soil preparation and effective weed control in agricultural cultivator setups. Constructed from heavy-duty durable steel, the sweep offers superior resistance to wear during demanding field operations. Its specialized angled profile efficiently cuts and lifts soil, which optimizes aeration and encourages healthy root development. The central mounting interface ensures a stable and secure attachment to the cultivator shank for reliable, consistent performance.

Technical Specifications

Material	Durable Steel
Mounting System	Central mounting hole for cultivator shanks

Key Features

Operational Benefits

- Optimized soil aeration
- Improved root development
- High wear resistance
- Secure shank attachment

Primary Applications	Soil Preparation, Weed Control, Seedbed Preparation, Row Crop Maintenance
