Overview

Versatile Milling Performance

This professional-grade wood-working milling machine is engineered for high-precision tasks and complex profile creation. Equipped with a tiltable spindle and robust construction, it offers exceptional versatility for professional woodworking shops. The system includes integrated variable speed control and safety features to ensure consistent, efficient results across various wood types.

Technical Specifications

Available RPM Settings

- 3000
- 4000
- 6000
- 8000

Model Identifier MX5615A

Max Milling Height 150 mm

Features

Key Capabilities Tiltable Spindle, Variable Speed Control, Adjustable Fences, Robust Frame

Safety Equipment Emergency Stop, Spindle Lock
