

Tin Coated 10 Liter Tank for Appliances

This tin-coated 10-liter tank is designed for household electrical appliances. It features a rectangular shape with rounded edges and durable metal tubing for structural support.

Product Overview

High-Efficiency Tin-Coated Reservoir

This 10-liter tank is engineered specifically for integration into household electrical appliances. Featuring an even tin-coated surface for enhanced performance, this unit prioritizes efficiency and long-term durability. Its compact, rectangular form factor includes specialized metal tubing for secure mounting, making it an ideal choice for water heating or storage applications.

Technical Specifications

Capacity

10 L

Volume Capacity

Net Weight

2.7 KGS

Key Features

Performance Advantages

- Even surface coating for consistent heating
- High thermal efficiency
- Engineered for appliance integration

Material & Build

Tin Coated, Metal Tubing, Durable Construction
