

Tinned Copper Tube Cable Lug Connector

Tinned copper tube cable lugs ensure reliable electrical connections in various applications. The tin plating enhances corrosion resistance and conductivity, making them suitable for terminating copper conductors.

Product Overview

High-Performance Tinned Copper Tube Lugs

These DTGB series cable lugs are engineered from high-conductivity copper tubing, ensuring a robust and reliable electrical connection. Each unit is electro-tin plated to provide superior corrosion resistance and prevent oxidation, making them ideal for use in harsh environments. Designed for easy cable insertion and secure crimping, these connectors are essential for power transmission, distribution, grounding, and control system applications.

Technical Details

High-conductivity copper tube lug with electro-tin plating for superior corrosion resistance.

Material	High-conductivity copper
Finish	Electro-tin plated
Connector Type	Tube terminal cable lug

Applications

Primary Applications

- Power transmission and distribution
- Electrical grounding systems
- Control systems
- Copper conductor termination

Certifications

Certifications

CE, ISO 9001
