

Tire Inspection and Repair Expander

The tire expander is a specialized tool for the safe inspection and repair of tires. It features adjustable arms and rollers to accommodate various tire sizes, ensuring uniform expansion and an integrated work light for enhanced visibility.

Product Overview

Professional Tire Inspection and Repair Expander

This specialized tire expander is engineered for efficient and safe tire maintenance and repair. Featuring a heavy-duty construction with a stable base, the device utilizes a reliable mechanical expansion system to accommodate various tire sizes. Integrated foot pedals and adjustable work lighting ensure high precision and operator comfort during intensive inspection tasks.

Technical Specifications

Key Functional Features

- Adjustable expansion arms
- Integrated rollers for uniform expansion
- Adjustable focused work light
- Convenient small parts storage tray

Operation Type	Hands-free mechanical foot pedal control
----------------	--

Design and Build

Visibility	High-visibility red
Surface Coating	Durable powder-coated finish
Build Quality	Heavy-duty, Industrial grade
