

Titanized Surface Spark Plug

This spark plug features a titanized surface for enhanced durability and extended service life. It is engineered to deliver excellent working performance in a variety of auto engine applications.

Product Overview

Titanized Surface Spark Plug

This high-performance spark plug features a specialized titanized surface treatment designed to deliver an extended service life and excellent operational performance. Engineered with a 95% pure alumina insulator, it offers superior resistance to heat shock and exceptional electrical insulation properties. The design incorporates a copper core electrode and nickel-plated housing to ensure optimal conductivity, corrosion resistance, and a reliable, gas-tight seal for demanding engine environments.

Technical Specifications

Insulator Material	95% Pure Alumina
Housing Finish	Nickel Plated
Electrode Core	Copper

Key Features

Performance Features

- Surface titanized finish for durability
- Multi-ribs of insulator eliminate flashover
- Heat crimping process for gas-tight fit
- Inner sealing with conductivity glass
- Multi-layer gaskets for reliable sealing

Available Model Markings	E8TC, D8T, D8TC, 08TC
