

TMR Feed Mixer

This TMR (Total Mixed Ration) feed mixer is designed for preparing and distributing homogeneous feed mixtures for livestock. The mixer ensures optimal nutrient distribution, enhancing animal health and productivity.

Overview

High-Efficiency TMR Feed Mixer

The 9JGW-10B TMR (Total Mixed Ration) feed mixer is a robust and efficient machine designed for preparing and distributing homogeneous feed mixtures for livestock. This mixer ensures optimal nutrient distribution, enhancing animal health and productivity. Engineered for reliability and ease of maintenance, it serves as an ideal solution for modern farming operations seeking to improve feed management.

Technical Specifications

Motor Power	15 kw
Processing Capacity	4-5 t/h
Blade Count	176
Model Number	9JGW-10B

Dimensions & Logistics

Machine Dimensions	4055 x 2215 x 2385 mm
HS Code	843610
