

Tomato Sauce Sachet Packaging Machine

This vertical form-fill-seal (VFFS) machine is designed for packaging tomato sauce and other viscous products into individual sachets. It automates the process of forming the package, filling it with a precise amount of product, and sealing it to create a finished pouch.

Overview

Automated Liquid Packaging Solution

This vertical form-fill-seal (VFFS) machine is precision-engineered for the automatic packaging of liquid, semi-liquid, and viscous materials. Designed with a compact, durable stainless steel structure, it ensures reliable performance for products like ketchup, honey, shampoo, and cosmetic pastes. The system integrates advanced photoelectric eye control and frequency-controlled motor speed to deliver stable, high-efficiency operation while minimizing noise and energy consumption.

Technical Specifications

Key Features

- Compact structure
- Step motor membrane pulling
- Photoelectric eye control system
- Frequency-controlled motor speed
- Ribbon or hot printing device
- Integrated cut-off device
- Rotating cutter device

Suitable Materials

Water, Honey, Cream, Shampoo, Cosmetic Cream, Paste, Sauce, Oil, Bean Sauce, Chocolate Sauce, Ketchup

Performance Metrics

Operational Benefits

1 Low

Noise Level

1 Low

Failure Rate

1 High

Energy Efficiency
