

Tool Balancer with Slide Rail

This tool balancer suspends tools, lessening operator fatigue and improving productivity. It features adjustable spring tension, which allows for balancing tools of different weights.

Product Overview

Precision Tool Management

This industrial tool balancer is engineered to suspend heavy equipment, significantly reducing operator fatigue and improving workflow efficiency. By utilizing imported spring technology, it provides high load-bearing capacity and smooth operation for demanding assembly environments. It is a reliable solution for maintaining a safe and organized workspace in manufacturing facilities.

Technical Specifications

Load Capacity Range

1 kg

Minimum Load

400 kg

Maximum Load

Operating Stroke

1.5 m

Minimum Stroke

3 m

Maximum Stroke

Construction Features

Imported Spring Line, Adjustable Tension, Durable Construction

Applications

Recommended Environments

- Assembly Lines
- Manufacturing Facilities
- Industrial Workshops
