Product Overview

High-Performance Automotive Toothed Belt

This high-performance AVX toothed belt is precision-engineered for automotive engine applications, ensuring optimal power transmission and reliability. Designed to meet or exceed OEM specifications, the belt features a specialized toothed profile that provides a secure grip, minimizing slippage and reducing noise and vibration. It serves as a durable, long-lasting solution for engine maintenance and repair, helping to restore vehicle performance and prevent costly engine damage.

Technical Specifications

Key Features

- Optimal power transmission
- Reduced slippage
- Precision-engineered tooth profile
- Low noise and vibration operation
- High durability against wear and tear

Model Markings

111MR17 • 70

Belt Type	AVX Toothed Belt
Compatibility	Audi, BMW
