

Toothpaste Tube Filling and Sealing Machine

This automatic machine fills and seals toothpaste tubes. It ensures precise filling volumes and secure sealing to maintain product integrity and prevent leakage.

Product Overview

Professional Tube Filling and Sealing

This automated filling and sealing solution is designed for the medicine, food, cosmetics, and daily chemical industries. It handles various paste and viscous fluid materials with high precision. The system integrates tube feeding, washing, filling, sealing, and batch coding into a compact, fully closed, and GMP-compliant unit.

Performance Metrics

Filling Speed Range

- 0-25 bottles / min
- 20-60 bottles / min

Filling Range	250 ml
Filling Accuracy	d ± 1%

Technical Construction

Safety Features

- Door stop security
- No-fill protection
- Overload protection

Key Automation Features

Frequency converter control • Photoelectric positioning • Intelligent temperature cooling

Contact Parts Material	316L Stainless Steel, GMP Compliant
