

# Top-Freezer Absorption Refrigerator

This top-freezer refrigerator utilizes absorption technology for cooling. The unit features a compact design with a separate freezer compartment located above the main refrigerator section.

## Product Overview

### Efficient Domestic Cooling Solution

This top-freezer absorption refrigerator is designed specifically for domestic household use, offering a reliable cooling solution without the need for a traditional compressor. Its compact design features a separate top-mounted freezer compartment, providing organized storage for both frozen and fresh goods. The unit is finished with a durable white enamel coating, ensuring it is both easy to clean and built to last in a home environment.
