

Top-Freezer Refrigerator

This refrigerator features a top-freezer design. It is equipped with high-density foam insulation and an optimized cooling system.

Product Overview

Professional Top-Freezer Refrigeration Solutions

This series of high-efficiency top-freezer refrigerators offers versatile cooling solutions for commercial and residential applications. Engineered with advanced precision copper/steel tube construction and optimized cooling systems, these units ensure rapid temperature regulation and consistent performance. With specialized soft-freezing technology at -7°C , these refrigerators maintain the nutritional integrity and texture of meat, allowing for easy preparation without the need for defrosting.

Performance Features

Key Performance Indicators

-7°C

Soft-Freezing Temperature

Design and Aesthetics

Model Variants

- BCD-172
- BCD-182
- BCD-192
- BCD-198S

Available Finishes

White Glass, Champagne Gold Glass, Red Glass, Brushed Metal

Technical Specifications

Key Technical Features

- High-Efficiency Compressor
- High-Density Foam Insulation
- Activated Carbon Deodorizer
- Precision Copper/Steel Tube Construction
- LED Interior Lighting
- Fast Cooling Function
