

Top-Freezer Refrigerator with LED Lighting

This refrigerator features energy-saving technology and intelligent temperature control. Its white LED lighting provides efficient illumination, and anti-bacterial materials promote a healthy environment.

Overview

Professional Top-Freezer Refrigeration

This top-freezer refrigerator series offers efficient cooling performance paired with advanced energy-saving technology, including high-efficiency compressors and optimized heat exchange systems. Designed for longevity and hygiene, the unit features anti-bacterial interiors and intelligent temperature compensation that adapts to seasonal environmental changes. The sleek mirror-finish exterior and bright LED interior lighting provide a modern look and excellent accessibility for any commercial or professional setting.

Key Features

Integrated temperature transmitter for intelligent automatic compensation and climate control.

Key Highlights

Energy Saving, Anti-bacteria, Intelligent Temperature Control, LED Lighting, Mirror Finish

Technical Specifications

Model Performance Data

Model	Net Volume (L)	Freezer Volume (L)	Input Power (W)	Energy (kWh/24h)
BCD-186GR	186	68	100	0.46
BCD-196GR	196	68	100	0.46
BCD-216GR	216	92	100	0.49

Energy Star Rating

Internal Components

Optimized wire tube evaporator ensures superior cooling efficiency and structural durability.

Refrigeration Technologies

- High-efficiency compressor
- R600a refrigerant
- Wire tube evaporator
- Double door gaskets
- Ultra-thick insulation
