

Top-Freezer Refrigerator with LED Lighting

This refrigerator features energy-saving technology and intelligent temperature control. The white LED lighting provides a clear view of the refrigerator's contents while consuming less energy.

Product Overview

Efficient Cooling Technology

This top-freezer refrigerator combines intelligent temperature control with energy-saving design to provide reliable food preservation. Featuring high-efficiency compressors and advanced insulation, the unit operates effectively across varying environmental conditions. Its integrated bright white LED lighting and automatic compensation function ensure low energy consumption and long-lasting performance for professional or residential environments.

Technical Specifications

Model Performance Data

Model	Net Volume (L)	Freezer Vol (L)	Energy (kWh/24h)
BCD-187CHK2A	187	68	0.29
BCD-197CHK2A	197	68	0.29
BCD-217CHK2A	217	86	0.39

Rated Input Power 100 W

Energy Star Rating 3

Key Features

Environmental temperature transmitter for automatic seasonal climate compensation.

Smart Features

Auto Temperature Compensation • Width Climate Zone • Wide Voltage Range • White LED Lighting

Energy Saving Features

High Efficiency Compressor, R600a Refrigerant, Double Door Gaskets, Ultra-thick Insulation, Optimized Heat Exchange
