

Top-Freezer Refrigerator with LED Lighting

This top-freezer refrigerator features energy-saving technology and intelligent temperature control. The white LED lighting provides bright illumination while consuming less energy.

Product Overview

High-Efficiency Top-Freezer Refrigerator

This top-freezer refrigerator series offers advanced energy-saving technology, utilizing high-efficiency compressors and optimized thermal insulation. Designed with intelligent temperature compensation, the unit maintains consistent performance across various environmental conditions without manual adjustments. The interior features long-lasting white LED lighting and anti-bacterial materials, ensuring both hygiene and visibility for stored goods.

Performance Specifications

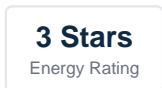

The integrated wire tube evaporator ensures high refrigeration efficiency and improved weight capacity.

Model Technical Data

Model	Net Vol (L)	Freezer Vol (L)	Power (W)	Energy (kWh/24h)
BCD-190KU	190	47	100	0.45
BCD-197KU	197	68	100	0.43
BCD-217KU	217	92	100	0.45
BCD-252KU	252	105	100	0.49

Energy Star Rating

Key Features

Intelligent temperature sensor for low-temperature automatic compensation.

Intelligent Operation

- Environmental temperature transmitter
- Low-temperature automatic compensation
- Automatic compressor activation above 0°C
- Anti-bacterial interior and handle materials

Efficiency Technologies

R600a Refrigerant, High-Efficiency Compressor, Double Door Gaskets, Ultra-thick Insulation
