

Top-Freezer Refrigerator with LED Lighting

This refrigerator features energy-saving technology and LED lighting. It utilizes a wire tube evaporator to ensure a high refrigerant effect.

Overview

High-Efficiency Top-Freezer Refrigerator

This top-freezer refrigerator combines intelligent temperature control with energy-efficient cooling technology. Designed for reliability, it features advanced insulation, a high-efficiency compressor, and R600a refrigerant to minimize power consumption. With integrated anti-bacterial materials and bright, long-lasting LED lighting, this unit offers a clean and healthy storage solution for food preservation.

Performance Parameters

High-efficiency wire tube evaporator ensures superior heat exchange and structural durability.

Key Performance Metrics

100 W

Rated Input Power

0.49 Kw.h/24h

Energy Consumption

3 Stars

Star Rating

Model Specifications

Feature	BCD-177CK	BCD-197CK
Net Volume (L)	177	197
Deep Freezing Volume (L)	68	68

Technology & Features

The intelligent temperature transmitter allows for automatic compensation and consistent compressor operation.

Core Technologies	Energy Saving, Intelligent Temperature Transmitter, Anti-bacteria Construction, Low Temperature Auto-compensation
Interior Lighting	White LED
